TECHNICAL SKILLS

Languages: JavaScript (ES6+), CSS3, HTML5

Frameworks/Libraries: React Js, Bootstrap, AEM(Adobe Experience Manager) Sites

Developer Tools: Git, GitHub, VS Code, Chrome DevTools

Methodologies: Agile, SCRUM

PROFESSIONAL EXPERIENCE

Frontend React Developer

Tata Consultancy Services, Mumbai

May 2022 - Present

Project: Indian Hotels Company Ltd.

JavaScript (ES6+), CSS3, HTML5, AEM(Site), GIT

- Developed responsive UI/UX web pages and features for an e-commerce site, fixed code defects, and boosted user engagement, increasing conversion rates by 20%.
- Optimized web performance, reducing load times by 30% by minification and lazy loading.
- Implemented Google Analytics and established GDPR compliance, improving data accuracy by 25% and user tracking efficiency by 30%.
- Gathered client requirements and provided features and deliverables estimations.
- Assured AA accessibility standards (WAGC) were met, such as creating documentation for best practices, establishing a standard accessibility checklist for developers, and facilitating knowledge shares.
- Managed Business Continuity Planning (BCP) with comprehensive documentation, ensuring project resilience and boosting client confidence and satisfaction.

PERSONAL PROJECTS

iNotebook - Your Notes on cloud

React js, Express JS, MongoDB, API, JavaScript, Bootstrap, HTML

- A full-stack application built using the MERN stack. Stores notes securely on the cloud. It also gives you the functionality to edit and delete your previous written notes.
- Used ExpressJs to manage backed services.
- Incorporated custom API services to access MongoDB.
- Implemented user authentication using JWT token.
- Used password hashing for user data security.
- Developed react.js components and functionalities to perform CRUD operations by the end user.

PrimeBrief - A news website - <https://primebrief.netlify.app/>

React js, API, JavaScript, Bootstrap, HTML

- Developed a real time news website using an external API service.
- Used react-router-dom to navigate between the different news categories.
- Implemented infinite scroll using NPM package "react-infinite-scroll-component".
- Added a top loading bar for the visual representation of the component loading process.
- Incorporated a toggle button to switch between dark and light modes on the website by parsing appropriate props to the component.
